Education/Vocation Release Program	23
State Hospital Training Program	24
Office of Manpower Development Job Placements	24
IV. Bridgewater State Hospital	
Monthly Utilization Report for Seclusion and Restraint	25

MONTHLY STATISTICAL REPORT HIGHLIGHTS

March 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the March figures cover the period from February 28, 1988 to March 26, 1988.

Population

During March the DOC population increased by 95 offenders from 6629 to 6724 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 686 offenders from 6038 in March, 1987 to 6724 in March, 1988. This represents an increase of 11%.

Admissions

During March there were 269 offenders committed to the DOC from courts including 131 to Cedar Junction, 54 to Concord and 84 to Framingham. To date there have been 783 court commitments to the DOC during 1988, including 343 to Cedar Junction, 189 to Concord and 251 to Framingham. This represents an increase of 1% over the number of court commitments during the same period in 1987 (N = 774). For Cedar Junction this represents a decrease of 6% over 1987 (N = 365); for Concord this represents a decrease of 3% over 1987 (N = 194); and for Framingham this represents an increase of 17% over 1987 (N = 215).

During March there were 78 offenders returned to the DOC as parole violators. To date there were 250 parole violators returned to the DOC during 1988. This represents

an increase of 21% over the number of parole violators returned during the same period in 1987 (N = 207).

Releases

During March, 138 offenders were paroled to the street, 82 were discharged, and 27 were released at expiration of sentence. To date there have been 374 offenders paroled to the street during 1988, 271 offenders discharged during 1988 and 88 offenders released at expiration of sentence during 1988. This represents a decrease of 10% over the number of offenders paroled to the street during the same period in 1987 (N = 415), an increase of 14% over the number of offenders discharged in 1987 (N = 238), and an increase of 29% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 68).

There were 89 males released to the street from secure DOC facilities in March. Of those, 37 (42%) were parole violators, 25 (28%) were first releases that had been in a lower security facility during their term of incarceration, and 27 (30%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During March, 8 offenders were declared on escape, and 9 offenders were returned to custody from escape status. The number of escapes decreased by 2 compared to March, 1987 (N = 10), and the number of returns from escape decreased by 2 compared to March, 1987 (N=11).

Lower Security Statistics

During March, 258 offenders were transferred from higher security facilities to lower security facilities. In addition, 74 were returned from lower security facilities to secure institutions. A comparison with the March, 1987 figures shows that transfers

from higher security to lower have increased by 28% (N = 202) and returns to higher security from lower have increased by 4% (N=71).

Lifers

At the end of March, there were 798 lifers in the DOC including Bridgewater. There were 329 for the offense of murder-1 (41%), 403 for murder-2 (51%), 21 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (3%) and 45 for sex offenses (6%).

Furlough Statistics

During March, a total of 262 furloughs were granted to 160 offenders, for an average of 1.6 furloughs per offender furloughed. These figures are lower than those for March, 1987 (633 furloughs granted to 432 offenders).

During the month, furloughs were granted to 0.2% of the maximum/medium population, 7.0% of the lower security population, and 28.7% of the contract pre-release population.

There were zero offenders declared on escape during March. At the end of the month there were 14 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of March, there were 455 offenders in work release programs working at 476 different jobs. These figures are lower than those for March, 1987 (566 offenders working at 593 jobs).

At the end of February, there were 53 offenders in education release programs - a figure that is higher than the corresponding figure for March, 1987 (N = 49).

DEPARTMENT POPULATION
AS OF MARCH 31, 1988

DOC Facilities

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (March 1-31). To standardize these figures for a 1 month period, multiply by 0.981.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the 4 week period.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

April 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the April figures cover the period from March 27, 1988 to April 30, 1988.

Population

During April the DOC population increased by 28 offenders from 6724 to 6752 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 650 offenders from 6102 in April, 1987 to 6752 in April, 1988. This represents an increase of 11%.

Admissions

During April there were 274 offenders committed to the DOC from courts including 129 to Cedar Junction, 53 to Concord and 92 to Framingham. To date there have been 1057 court commitments to the DOC during 1988, including 472 to Cedar Junction, 242 to Concord and 343 to Framingham. This represents a decrease of 2% over the number of court commitments during the same period in 1987 (N = 1074). For Cedar Junction this represents a decrease of 6% over 1987 (N = 500); for Concord this represents a decrease of 7% over 1987 (N = 259); and for Framingham this represents an increase of 9% over 1987 (N = 315).

During April there were 126 offenders returned to the DOC as parole violators. To date there were 376 parole violators returned to the DOC during 1988. This represents

an increase of 34% over the number of parole violators returned during the same period in 1987 (N = 281).

Releases

During April, 187 offenders were paroled to the street, 132 were discharged, and 33 were released at expiration of sentence. To date there have been 561 offenders paroled to the street during 1988, 403 offenders discharged during 1988, and 121 offenders released at expiration of sentence during 1988. This represents an increase of 3% over the number of offenders paroled to the street during the same period in 1987 (N = 543), an increase of 21% over the number of offenders discharged in 1987 (N = 333), and an increase of 41% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 86).

There were 110 males released to the street from secure DOC facilities in April. Of those, 50 (45%) were parole violators, 29 (26%) were first releases that had been in a lower security facility during their term of incarceration, and 31 (28%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During April, 17 offenders were declared on escape, and 9 offenders were returned to custody from escape status. The number of escapes increased by 4 compared to April, 1987 (N = 13), and the number of returns from escape decreased by 9 compared to April, 1987 (N = 18).

Lower Security Statistics

During April, 201 offenders were transferred from higher security facilities to lower security facilities. In addition, 100 were returned from lower security facilities to secure institutions. A comparison with the April, 1987 figures shows that transfers

from higher security to lower have decreased by 5% (N = 211) and returns to higher security from lower have increased by 39% (N = 72).

Lifers

At the end of April, there were 803 lifers in the DOC including Bridgewater. There were 332 for the offense of murder-1 (41%), 405 for murder-2 (50%), 21 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (3%) and 45 for sex offenses (6%).

Furlough Statistics

During April, a total of 303 furloughs were granted to 189 offenders, for an average of 1.6 furloughs per offender furloughed. These figures are lower than those for April, 1987 (625 furloughs granted to 458 offenders).

During the month, furloughs were granted to 0.3% of the maximum/medium population, 7.7% of the lower security population, and 36.3% of the contract pre-release population.

There were zero offenders declared on escape during April. At the end of the month there were 14 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of April, there were 478 offenders in work release programs working at 500 different jobs. These figures are lower than those for April, 1987 (524 offenders working at 547 jobs).

At the end of April, there were 47 offenders in education release programs - a figure that is the same as the corresponding figure for April, 1987 (N = 47).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (April 1-30). To standardize these figures for a 1 month period, multiply by 1.01.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the 4 week period.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

May 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the May figures cover the period from May 1, 1988 to May 28, 1988.

Population

During May the DOC population decreased by 30 offenders from 6752 to 6722 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 620 offenders from 6102 in May, 1987 to 6722 in May, 1988. This represents an increase of 10%.

Admissions

During May there were 243 offenders committed to the DOC from courts including 113 to Cedar Junction, 55 to Concord and 75 to Framingham. To date there have been 1300 court commitments to the DOC during 1988, including 585 to Cedar Junction, 297 to Concord and 418 to Framingham. This represents an increase of less 1% over the number of court commitments during the same period in 1987 (N = 1297). For Cedar Junction this represents a decrease of less than 1% over 1987 (N = 587); for Concord this represents a decrease of 5% over 1987 (N = 313); and for Framingham this represents an increase of 5% over 1987 (N = 397).

During May there were 75 offenders returned to the DOC as parole violators. To date there were 451 parole violators returned to the DOC during 1988. This represents an

increase of 28% over the number of parole violators returned during the same period in 1987 (N = 351).

Releases

During May, 162 offenders were paroled to the street, 112 were discharged, and 11 were released at expiration of sentence. To date there have been 723 offenders paroled to the street during 1988, 515 offenders discharged during 1988, and 132 offenders released at expiration of sentence during 1988. This represents an increase of 6% over the number of offenders paroled to the street during the same period in 1987 (N = 684), an increase of 17% over the number of offenders discharged in 1987 (N = 439), and an increase of 4% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 127).

There were 101 males released to the street from secure DOC facilities in May. Of those, 47 (46%) were parole violators, 34 (34%) were first releases that had been in a lower security facility during their term of incarceration, and 20 (20%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During May, 11 offenders were declared on escape, and 11 offenders were returned to custody from escape status. The number of escapes decreased by 20 compared to May, 1987 (N = 31), and the number of returns from escape decreased by 19 compared to May, 1987 (N = 30).

Lower Security Statistics

During May, 167 offenders were transferred from higher security facilities to lower security facilities. In addition, 69 were returned from lower security facilities to secure institutions. A comparison with the May, 1987 figures shows that transfers

from higher security to lower have decreased by 38% (N = 271) and returns to higher security from lower have decreased by 35% (N = 106).

Lifers

At the end of May, there were 808 lifers in the DOC including Bridgewater. There were 338 for the offense of murder-1 (42%), 405 for murder-2 (50%), 20 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 45 for sex offenses (6%).

Furlough Statistics

During May, a total of 226 furloughs were granted to 148 offenders, for an average of 1.5 furloughs per offender furloughed. These figures are lower than those for May, 1987 (692 furloughs granted to 443 offenders).

During the month, furloughs were granted to 0.2% of the maximum/medium population, 6.0% of the lower security population, and 28.6% of the contract pre-release population. Overall, furloughs were granted to 2.3 percent of the total population.
There were zero offenders declared on escape during May. At the end of the month there were 13 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of May, there were 477 offenders in work release programs working at 496 different jobs. These figures are lower than those for May, 1987 (523 offenders working at 547 jobs).

At the end of May, there were 30 offenders in education release programs - a figure that is lower than the corresponding figure for May, 1987 (N = 41).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (May 1-31). To standardize these figures for a 1 month period, multiply by 0.98.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

June 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the June figures cover the period from May 29, 1988 to June 25, 1988.

Population

During June the DOC population increased by 45 offenders from 6722 to 6767 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 572 offenders from 6195 in June, 1987 to 6767 in June, 1988. This represents an increase of 9%.

Admissions

During June there were 209 offenders committed to the DOC from courts including 105 to Cedar Junction, 28 to Concord and 76 to Framingham. To date there have been 1509 court commitments to the DOC during 1988, including 690 to Cedar Junction, 325 to Concord and 494 to Framingham. This represents a decrease of 4% over the number of court commitments during the same period in 1987 (N = 1574). For Cedar Junction this represents a decrease of 2% over 1987 (N = 707); for Concord this represents a decrease of 16% over 1987 (N = 385); and for Framingham this represents an increase of 2% over 1987 (N = 482).

During June there were 97 offenders returned to the DOC as parole violators. To date there were 548 parole violators returned to the DOC during 1988. This represents an

increase of 25% over the number of parole violators returned during the same period in 1987 (N = 439).

Releases

During June, 150 offenders were paroled to the street, 91 were discharged, and 12 were released at expiration of sentence. To date there have been 873 offenders paroled to the street during 1988, 606 offenders discharged during 1988, and 144 offenders released at expiration of sentence during 1988. This represents an increase of 4% over the number of offenders paroled to the street during the same period in 1987 (N = 842), an increase of 17% over the number of offenders discharged in 1987 (N = 516), and a decrease of 3% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 148).

There were 97 males released to the street from secure DOC facilities in June. Of those, 47 (48%) were parole violators, 27 (28%) were first releases that had been in a lower security facility during their term of incarceration, and 23 (24%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During June, 15 offenders were declared on escape, and 14 offenders were returned to custody from escape status. The number of escapes decreased by two compared to June, 1987 (N = 17), and the number of returns from escape decreased by 6 compared to June, 1987 (N = 20).

Lower Security Statistics

During June, 168 offenders were transferred from higher security facilities to lower security facilities. In addition, 68 were returned from lower security facilities to secure institutions. A comparison with the June, 1987 figures shows that transfers

from higher security to lower have decreased by 15% (N = 198) and returns to higher security from lower have decreased by 20% (N = 85).

Lifers

At the end of June, there were 809 lifers in the DOC including Bridgewater. There were 337 for the offense of murder-1 (42%), 406 for murder-2 (50%), 20 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 46 for sex offenses (6%).

Furlough Statistics

During June, a total of 278 furloughs were granted to 171 offenders, for an average of 1.6 furloughs per offender furloughed. These figures are lower than those for June, 1987 (446 furloughs granted to 314 offenders).

During the month, furloughs were granted to 0.3% of the maximum/medium population, 6.0% of the lower security population, and 41.0% of the contract pre-release population. Overall, furloughs were granted to 2.6 percent of the total population.
There were zero offenders declared on escape during June. At the end of the month there were 13 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of June, there were 478 offenders in work release programs working at 497 different jobs. These figures are similar to those for June, 1987 (477 offenders working at 504 jobs).

At the end of June, there were 27 offenders in education release programs - a figure that is lower than the corresponding figure for June, 1987 (N = 39).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (June 1-30). To standardize these figures for a 1 month period, multiply by 1.01.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

July 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the July figures cover the period from June 26, 1988 to July 30, 1988.

Population

During July the DOC population increased by six offenders from 6767 to 6773 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 607 offenders from 6166 in July, 1987 to 6773 in July, 1988. This represents an increase of 10%.

Admissions

During July there were 267 offenders committed to the DOC from courts including 110 to Cedar Junction, 53 to Concord and 104 to Framingham. To date there have been 1776 court commitments to the DOC during 1988, including 800 to Cedar Junction, 378 to Concord and 598 to Framingham. This represents an increase of 1% over the number of court commitments during the same period in 1987 (N = 1761). For Cedar Junction this represents an increase of 2% over 1987 (N = 784); for Concord this represents a decrease of 15% over 1987 (N = 442); and for Framingham this represents an increase of 12% over 1987 (N = 535).

During July there were 90 offenders returned to the DOC as parole violators. To date there were 638 parole violators returned to the DOC during 1988. This represents an

increase of 22% over the number of parole violators returned during the same period in 1987 (N = 524).

Releases

During July, 172 offenders were paroled to the street, 116 were discharged, and 48 were released at expiration of sentence. To date there have been 1045 offenders paroled to the street during 1988, 722 offenders discharged during 1988, and 192 offenders released at expiration of sentence during 1988. This represents an increase of 6% over the number of offenders paroled to the street during the same period in 1987 (N = 981), an increase of 17% over the number of offenders discharged in 1987 (N = 615), and an increase of 11% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 173).

There were 113 males released to the street from secure DOC facilities in July. Of those, 55 (49%) were parole violators, 27 (24%) were first releases that had been in a lower security facility during their term of incarceration, and 31 (27%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During July, 14 offenders were declared on escape, and 19 offenders were returned to custody from escape status. The number of escapes decreased by ten compared to July, 1987 (N = 24), and the number of returns from escape increased by 3 compared to July, 1987 (N = 16).

Lower Security Statistics

During July, 215 offenders were transferred from higher security facilities to lower security facilities. In addition, 89 were returned from lower security facilities to secure institutions. A comparison with the July, 1987 figures shows that transfers

from higher security to lower have increased by 9% (N = 197) and returns to higher security from lower have increased by 11% (N = 80).

Lifers

At the end of July, there were 819 lifers in the DOC including Bridgewater. There were 343 for the offense of murder-1 (42%), 409 for murder-2 (50%), 19 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 48 for sex offenses (6%).

Furlough Statistics

During July, a total of 279 furloughs were granted to 167 offenders, for an average of 1.7 furloughs per offender furloughed. These figures are lower than those for July, 1987 (344 furloughs granted to 256 offenders).

During the month, furloughs were granted to 0.3% of the maximum/medium population, 6.0% of the lower security population, and 38.8% of the contract pre-release population. Overall, furloughs were granted to 2.6 percent of the total population.

There was one offender declared on escape during July. At the end of the month there were 13 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of July, there were 487 offenders in work release programs working at 509 different jobs. These figures are higher than those for July, 1987 (465 offenders working at 491 jobs).

At the end of July, there were 17 offenders in education release programs - a figure that is lower than the corresponding figure for July, 1987 (N = 35).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (July 1-31). To standardize these figures for a 1 month period, multiply by 0.98.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

August 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the July figures cover the period from July 31, 1988 to August 27, 1988.

Population

During August the DOC population stayed the same when compared to July at 6773 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 574 offenders from 6199 in August, 1987 to 6773 in August, 1988. This represents an increase of 9%.

Admissions

During August there were 141 offenders committed to the DOC from courts including 57 to Cedar Junction, 19 to Concord and 65 to Framingham. To date there have been 1917 court commitments to the DOC during 1988, including 857 to Cedar Junction, 397 to Concord and 663 to Framingham. This represents a decrease of less than 1% over the number of court commitments during the same period in 1987 (N = 1921). For Cedar Junction this represents an increase of 1% over 1987 (N = 849); for Concord this represents a decrease of 16% over 1987 (N = 471); and for Framingham this represents an increase of 10% over 1987 (N = 601).

During August there were 98 offenders returned to the DOC as parole violators. To date there were 736 parole violators returned to the DOC during 1988. This represents an

increase of 21% over the number of parole violators returned during the same period in 1987 (N = 606).

Releases

During August, 136 offenders were paroled to the street, 107 were discharged, and 32 were released at expiration of sentence. To date there have been 1181 offenders paroled to the street during 1988, 829 offenders discharged during 1988, and 224 offenders released at expiration of sentence during 1988. This represents an increase of 6% over the number of offenders paroled to the street during the same period in 1987 (N = 1116), an increase of 17% over the number of offenders discharged in 1987 (N = 710), and an increase of 18% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 190).

There were 93 males released to the street from secure DOC facilities in August. Of those, 50 (54%) were parole violators, 21 (23%) were first releases that had been in a lower security facility during their term of incarceration, and 22 (24%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During August, 13 offenders were declared on escape, and 9 offenders were returned to custody from escape status. The number of escapes decreased by twenty two compared to August, 1987 (N = 34), and the number of returns from escape decreased by twenty one compared to August, 1987 (N = 30).

Lower Security Statistics

During August, 196 offenders were transferred from higher security facilities to lower security facilities. In addition, 48 were returned from lower security facilities to secure institutions. A comparison with the August, 1987 figures shows that transfers

from higher security to lower have decreased by 20% (N = 246) and returns to higher security from lower have decreased by 54% (N = 103).

Lifers

At the end of August, there were 825 lifers in the DOC including Bridgewater. There were 347 for the offense of murder-1 (42%), 411 for murder-2 (50%), 19 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 48 for sex offenses (6%).

Furlough Statistics

During August, a total of 208 furloughs were granted to 134 offenders, for an average of 1.6 furloughs per offender furloughed. These figures are lower than those for August, 1987 (325 furloughs granted to 225 offenders).

During the month, furloughs were granted to 0.1% of the maximum/medium population, 5.4% of the lower security population, and 27.2% of the contract pre-release population. Overall, furloughs were granted to 2.1 percent of the total population.
There were zero offenders declared on escape during August. At the end of the month there were 11 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of August, there were 504 offenders in work release programs working at 529 different jobs. These figures are higher than those for August, 1987 (499 offenders working at 525 jobs).

At the end of August, there were 15 offenders in education release programs - a figure that is lower than the corresponding figure for August, 1987 (N = 25).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (August 1-31). To standardize these figures for a 1 month period, multiply by 0.98.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

September 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the September figures cover the period from August 28, 1988 to September 24, 1988.

Population

During September the DOC population increased by 12 offenders from 6773 to 6785 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 520 offenders from 6265 in September, 1987 to 6785 in September, 1988. This represents an increase of 8%.

Admissions

During September there were 192 offenders committed to the DOC from courts including 82 to Cedar Junction, 29 to Concord and 81 to Framingham. To date there have been 2109 court commitments to the DOC during 1988, including 939 to Cedar Junction, 426 to Concord and 744 to Framingham. This represents a decrease of 2% over the number of court commitments during the same period in 1987 (N = 2154). For Cedar Junction this represents a decrease of 1% over 1987 (N = 949); for Concord this represents a decrease of 19% over 1987 (N = 523); and for Framingham this represents an increase of 9% over 1987 (N = 682).

During September there were 99 offenders returned to the DOC as parole violators. To date there were 835 parole violators returned to the DOC during 1988. This represents

an increase of 19% over the number of parole violators returned during the same period in 1987 (N = 703).

Releases

During September, 149 offenders were paroled to the street, 82 were discharged, and 22 were released at expiration of sentence. To date there have been 1330 offenders paroled to the street during 1988, 911 offenders discharged during 1988, and 246 offenders released at expiration of sentence during 1988. This represents an increase of 6% over the number of offenders paroled to the street during the same period in 1987 (N = 1254), an increase of 14% over the number of offenders discharged in 1987 (N = 800), and an increase of 14% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 215).

There were 87 males released to the street from secure DOC facilities in September. Of those, 36 (41%) were parole violators, 23 (26%) were first releases that had been in a lower security facility during their term of incarceration, and 28 (32%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During September, 15 offenders were declared on escape, and 20 offenders were returned to custody from escape status. The number of escapes decreased by three compared to September, 1987 (N = 18), and the number of returns from escape decreased by four compared to September, 1987 (N = 24).

Lower Security Statistics

During September, 160 offenders were transferred from higher security facilities to lower security facilities. In addition, 75 were returned from lower security facilities to secure institutions. A comparison with the September, 1987 figures shows that transfers

from higher security to lower have decreased by 14% (N = 185) and returns to higher security from lower have decreased by 26% (N = 102).

Lifers

At the end of September, there were 826 lifers in the DOC including Bridgewater. There were 347 for the offense of murder-1 (42%), 411 for murder-2 (50%), 19 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 49 for sex offenses (6%).

Furlough Statistics

During September, a total of 225 furloughs were granted to 150 offenders, for an average of 1.5 furloughs per offender furloughed. These figures are lower than those for September, 1987 (246 furloughs granted to 194 offenders).

During the month, furloughs were granted to 0.3% of the maximum/medium population, 5.8% of the lower security population, and 32.4% of the contract pre-release population. Overall, furloughs were granted to 2.3 percent of the total population.
There were zero offenders declared on escape during September. At the end of the month there were 11 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of September, there were 501 offenders in work release programs working at 534 different jobs. These figures are lower than those for September, 1987 (522 offenders working at 549 jobs).

At the end of September, there were 44 offenders in education release programs - a figure that is lower than the corresponding figure for September, 1987 (N = 60).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (September 1-30). To standardize these figures for a 1 month period, multiply by 1.01.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

October 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the October figures cover the period from September 25, 1988 to October 29, 1988.

Population

During October the DOC population increased by 7 offenders from 6785 to 6792 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 417 offenders from 6375 in October, 1987 to 6792 in October, 1988. This represents an increase of 7%.

Admissions

During October there were 352 offenders committed to the DOC from courts including 163 to Cedar Junction, 68 to Concord and 121 to Framingham. To date there have been 2461 court commitments to the DOC during 1988, including 1102 to Cedar Junction, 494 to Concord and 865 to Framingham. This represents an increase of 1% over the number of court commitments during the same period in 1987 (N = 2439). For Cedar Junction this represents a decrease of 3% over 1987 (N = 1070); for Concord this represents a decrease of 19% over 1987 (N = 604); and for Framingham this represents an increase of 13% over 1987 (N = 765).

During October there were 140 offenders returned to the DOC as parole violators. To date there were 975 parole violators returned to the DOC during 1988. This represents

an increase of 21% over the number of parole violators returned during the same period in 1987 (N = 807).

Releases

During October, 173 offenders were paroled to the street, 138 were discharged, and 30 were released at expiration of sentence. To date there have been 1503 offenders paroled to the street during 1988, 1049 offenders discharged during 1988, and 276 offenders released at expiration of sentence during 1988. This represents an increase of 7% over the number of offenders paroled to the street during the same period in 1987 (N = 1406), an increase of 14% over the number of offenders discharged in 1987 (N = 917), and an increase of 17% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 235).

There were 117 males released to the street from secure DOC facilities in October. Of those, 59 (50%) were parole violators, 33 (28%) were first releases that had been in a lower security facility during their term of incarceration, and 25 (21%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During October, 11 offenders were declared on escape, and 14 offenders were returned to custody from escape status. The number of escapes decreased by seven compared to October, 1987 (N = 18), and the number of returns from escape decreased by eight compared to October, 1987 (N = 22).

Lower Security Statistics

During October, 168 offenders were transferred from higher security facilities to lower security facilities. In addition, 91 were returned from lower security facilities to secure institutions. A comparison with the October, 1987 figures shows that transfers

from higher security to lower have decreased by 29% (N = 238) and returns to higher security from lower have decreased by 10% (N = 101).

Lifers

At the end of October, there were 829 lifers in the DOC including Bridgewater. There were 349 for the offense of murder-1 (42%), 411 for murder-2 (50%), 19 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 50 for sex offenses (6%).

Furlough Statistics

During October, a total of 266 furloughs were granted to 146 offenders, for an average of 2.2 furloughs per offender furloughed. These figures are lower than those for October, 1987 (259 furloughs granted to 181 offenders).

During the month, furloughs were granted to 0.2% of the maximum/medium population, 6.1% of the lower security population, and 34.8% of the contract pre-release population. Overall, furloughs were granted to 2.2 percent of the total population.

There was one offender declared on escape during October. At the end of the month there were 11 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of October, there were 554 offenders in work release programs working at 527 different jobs. These figures are lower than those for October, 1987 (524 offenders working at 552 jobs).

At the end of October, there were 52 offenders in education release programs - a figure that is lower than the corresponding figure for October, 1987 (N = 55).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (October 1-31). To standardize these figures for a 1 month period, multiply by 0.98.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

November 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the November figures cover the period from October 30, 1988 to November 26, 1988.

Population

During November the DOC population increased by 78 offenders from 6792 to 6870 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 503 offenders from 6367 in November, 1987 to 6870 in November, 1988. This represents an increase of 8%.

Admissions

During November there were 227 offenders committed to the DOC from courts including 110 to Cedar Junction, 52 to Concord and 65 to Framingham. To date there have been 2688 court commitments to the DOC during 1988, including 1212 to Cedar Junction, 546 to Concord and 930 to Framingham. This represents an increase of 1% over the number of court commitments during the same period in 1987 (N = 2657). For Cedar Junction this represents an increase of 4% over 1987 (N = 1163); for Concord this represents a decrease of 17% over 1987 (N = 660); and for Framingham this represents an increase of 12% over 1987 (N = 834).

During November there were 93 offenders returned to the DOC as parole violators. To date there were 1068 parole violators returned to the DOC during 1988. This

represents an increase of 21% over the number of parole violators returned during the same period in 1987 (N = 884).

Releases

During November, 144 offenders were paroled to the street, 99 were discharged, and 6 were released at expiration of sentence. To date there have been 1647 offenders paroled to the street during 1988, 1148 offenders discharged during 1988, and 282 offenders released at expiration of sentence during 1988. This represents an increase of 11% over the number of offenders paroled to the street during the same period in 1987 (N = 1483), an increase of 14% over the number of offenders discharged in 1987 (N = 1007), and an increase of 13% over the number of offenders released at expiration of sentence during the same period in 1987 (N = 249).

There were 83 males released to the street from secure DOC facilities in November. Of those, 37 (45%) were parole violators, 25 (30%) were first releases that had been in a lower security facility during their term of incarceration, and 21 (25%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During November, 9 offenders were declared on escape, and 10 offenders were returned to custody from escape status. The number of escapes decreased by eight compared to November, 1987 (N = 17), and the number of returns from escape decreased by six compared to November, 1987 (N = 16).

Lower Security Statistics

During November, 196 offenders were transferred from higher security facilities to lower security facilities. In addition, 71 were returned from lower security facilities to secure institutions. A comparison with the November, 1987 figures shows that transfers

from higher security to lower have increased by 17% (N = 167) and returns to higher security from lower have decreased by 15% (N = 84).

Lifers

At the end of November, there were 836 lifers in the DOC including Bridgewater. There were 355 for the offense of murder-1 (42%), 412 for murder-2 (49%), 20 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 49 for sex offenses (6%).

Furlough Statistics

During November, a total of 212 furloughs were granted to 135 offenders, for an average of 2.0 furloughs per offender furloughed. These figures are lower than those for November, 1987 (235 furloughs granted to 182 offenders).

During the month, furloughs were granted to 0.2% of the maximum/medium population, 6.0% of the lower security population, and 25.7% of the contract pre-release population. Overall, furloughs were granted to 2.0 percent of the total population.
There were zero offenders declared on escape during November. At the end of the month there were 11 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of November, there were 506 offenders in work release programs working at 530 different jobs. These figures are lower than those for November, 1987 (515 offenders working at 544 jobs).

At the end of November, there were 42 offenders in education release programs - a figure that is lower than the corresponding figure for November, 1987 (N = 52).

1. Total hours does not include time spent in seclusion and/or restraint by 4 special needs patients who reside on the Admissions and Medical Units.

2. Data represents the calendar month (November 1-30). To standardize these figures for a 1 month period, multiply by 1.01.

3. Figures constitute numbers of patients discharged from seclusion or restraint during the month.

MONTHLY STATISTICAL REPORT HIGHLIGHTS

December 1988

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the December figures cover the period from November 27, 1988 to December 31, 1988.

Population

During December the DOC population decreased by 43 offenders from 6870 to 6827 (excluding those at Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 492 offenders from 6335 in December, 1987 to 6827 in December, 1988. This represents an increase of 8%.

Admissions

During December there were 273 offenders committed to the DOC from courts including 149 to Cedar Junction, 41 to Concord and 83 to Framingham. To date there have been 2961 court commitments to the DOC during 1988, including 1361 to Cedar Junction, 587 to Concord and 1013 to Framingham. This represents an increase of 4% over the number of court commitments during the same period in 1987 (N = 2848). For Cedar Junction this represents an increase of 9% over 1987 (N = 1250); for Concord this represents a decrease of 16% over 1987 (N = 701); and for Framingham this represents an increase of 13% over 1987 (N = 897).

During December there were 109 offenders returned to the DOC as parole violators. To date there were 1177 parole violators returned to the DOC during 1988. This

represents an increase of 20% over the number of parole violators returned during the same period in 1987 (N=979).

Releases

During December, 202 offenders were paroled to the street, 139 were discharged, and 14 were released at expiration of sentence. To date there have been 1849 offenders paroled to the street during 1988, 1287 offenders discharged during 1988, and 296 offenders released at expiration of sentence during 1988. This represents an increase of 88% over the number of offenders paroled to the street during the same period in 1987 (N=984), an increase of 16% over the number of offenders discharged in 1987 (N=1106), and an increase of 10% over the number of offenders released at expiration of sentence during the same period in 1987 (N=269).

There were 145 males released to the street from secure DOC facilities in December. Of those, 63 (43%) were parole violators, 41 (28%) were first releases that had been in a lower security facility during their term of incarceration, and 41 (28%) were first releases that had not been in a lower security institution during their incarceration.

Escapes

During December, 7 offenders were declared on escape, and 17 offenders were returned to custody from escape status. The number of escapes decreased by one compared to December, 1987 (N=8), and the number of returns from escape stayed by the same compared to December, 1987 (N=17).

Lower Security Statistics

During December, 284 offenders were transferred from higher security facilities to lower security facilities. In addition, 118 were returned from lower security facilities to secure institutions. A comparison with the December, 1987 figures shows that transfers

from higher security to lower have increased by 75% (N = 162) and returns to higher security from lower have decreased by 17% (N = 143).

Lifers

At the end of December, there were 837 lifers in the DOC including Bridgewater. There were 355 for the offense of murder-1 (42%), 413 for murder-2 (49%), 20 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (2%) and 49 for sex offenses (6%).

Furlough Statistics

During December, a total of 266 furloughs were granted to 169 offenders, for an average of 1.6 furloughs per offender furloughed. These figures are lower than those for December, 1987 (387 furloughs granted to 285 offenders).

During the month, furloughs were granted to 0.4% of the maximum/medium population, 6.8% of the lower security population, and 32.8% of the contract pre-release population. Overall, furloughs were granted to 2.5 percent of the total population.
There were zero offenders declared on escape during December. At the end of the month there were 11 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

Work/Education Release

At the end of December, there were 492 offenders in work release programs working at 520 different jobs. These figures are similar to those for December, 1987 (494 offenders working at 518 jobs).

At the end of December, there were 23 offenders in education release programs - a figure that is lower than the corresponding figure for December, 1987 (N = 37).
